CREATIVE JOINERY
[CHORLEY] LTD

There are many different layouts, configurations and design options available when it comes to traditional wardrobes. We manufacture single, double, corner and L-shaped wardrobes to fit the space available.

We can fit traditional wardrobes into almost any space such as: sloped ceilings, stair bulkheads, alcoves and chimney breasts.

We have many door and drawer styles available to choose from. We separate this into our 'Vienna' range and our 'Premium' range.

Vienna Range

Our Vienna range is a PVC (polyvinyl chloride) edged door or drawer. The body of the doors and drawers are laminated with vinyl.

Our Vienna doors and drawers come in a plain design, in a square style.

Any colour finish can be chosen, and the edges can either be colour matched, or a contrasting edge can be applied.

There are so many ways to style this range!

All PVC products can be colour matched.

Premium Range

We have many door styles available that are vinyl wrapped MFC. There are over 50 premium styles to choose from! All the door styles available can be found on our website.

Most door styles have a matching drawer front style, and the doors and drawers can be finished in any colour finish with a matching edge.

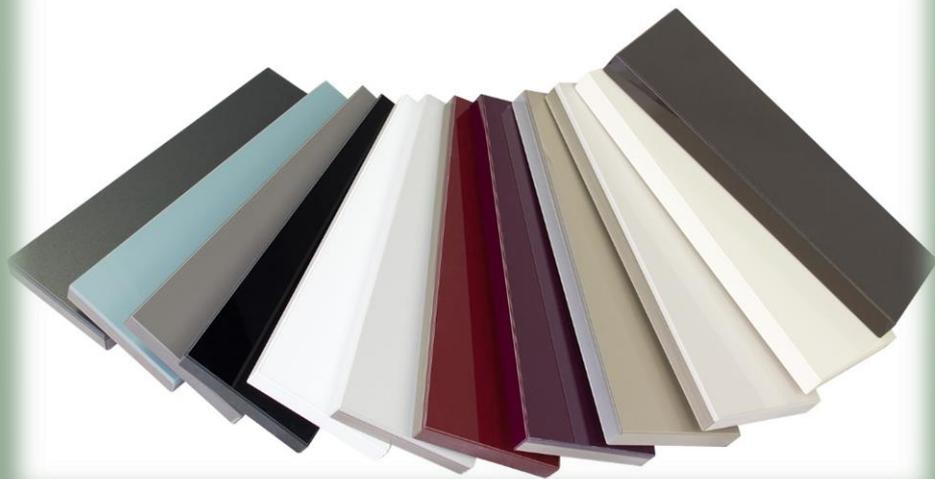

Acrylic Edged Range

We also offer acrylic doors which are the best door style for bathroom, kitchen or utility doors. Our acrylic edged doors can be edged with a matching, contrasting or glass edge.

The colour finishes available are mirror gloss only and therefore cannot be colour matched to the carcass exactly.

A contrasted carcass is recommended for this door style.

Design Options

Our traditional doors can be glazed with a mirror, glass or coloured glass. Silvered, bronzed and grey smoked mirror options are available. Mirrors can also be fitted onto the reverse of the doors.

Matt, Oak or High Gloss finishes are available. We recommend that whenever a High Gloss finish is chosen, a contrasting carcass is fitted.

We have many different lighting options that can be purchased such as LED light strips and downlighters, and lights that are compatible with 'Amazon Alexa'.

The hinges fitted to each door are soft closing and extra sturdy for longevity.

We have a wide range of handles to choose from that can be seen in our showroom. We also offer push catches as an alternative to handles for a sleek look.

Some of our premium door styles do not require a handle such as 'Avienda', 'Belize' and 'Metropole'.
